PROGRESS REPORT FOR

Association for Project Safety Ltd & Gift a Tree

Environmental Contribution Summary

Your trees are all on our Devon estate

Gift a Tree partnership

Your Company Facts

28

Trees planted per month

Average

274

Trees planted annually

Estimated

548

Total over partnership

Trees in the ground

Your trees are all on our Devon estate.

Estimated Environmental Impact

Average CO_2 absorption per tree

20-25 kg

Once mature

Estimated annual CO_2 capture

6.7-8.4 tonnes

Estimated CO_2 captured over 10 years

670-840 tonnes

Wider Environmental Benefits

Your trees contribute to:

- Habitat creation for wildlife
- Increased biodiversity
- Soil stabilisation
- Improved water retention
- Natural carbon capture
- Restoration of degraded forest land
- Natural ecosystem improvements
- Sustainable food for local communities
- Carbon sequestration & climate mitigation
- Long-term ecosystem regeneration

Long-Term Forest Growth

As trees mature they produce seeds, meaning your woodland can naturally expand over time.

The trees planted through your partnership today have the potential to generate **thousands of additional trees over the coming decades.**
