

Occupational Health Exam

Preventing ill health through design is a key part of project development.

This exam is intended to test your knowledge of facts about ill health in the UK construction industry and what a designer's response might be.

There will be 20 questions and you have 60 minutes in which to sit the exam.

Please note that these specialist exams are not about general knowledge.

The exams are a means by which Members who have specialist knowledge can be assessed.

Please do not attempt the exam without either having sufficient knowledge and understanding of the subject or having undertaken background reading and/or CPD or training.
