

Technical Safety Manager/Associate

Role

Steel River Consultants (SRC) is looking for an experienced professional with a strong understanding of CDM, Principal Designer responsibilities and design risk management to support projects across various sectors.

We're keen to hear from people who can combine technical design understanding with practical health and safety experience, working with clients and design teams to identify risks early and help deliver safer projects.

The role will involve:

- Delivering CDM advisory and Principal Designer services.
- Supporting design risk reviews and promoting Safe by Design principles.
- Working with designers and project teams to eliminate or reduce risks throughout the project lifecycle.
- Providing clear, practical advice and building strong client relationships.

Desirable qualifications and experience:

- A relevant technical or academic engineering qualification.
- NEBOSH Construction/Diploma.
- APS Membership.
- Experience within infrastructure, energy, or utilities.
- Strong communication skills and the confidence to constructively challenge design decisions.
- Proven track record working with design safety risk management teams

Location: - Candidates should be within commuting distance of our Teesside office, in Stockton-on-Tees, United Kingdom

Salary: Salary and benefits package negotiable, based on experience.

This is an opportunity to bring your knowledge and experience to a consultancy supporting projects from concept to completion.

Contact Us: CVs should be sent to info@srconsultants.co.uk
